Breast Cancer Treatment can involve many oncology providers and multiple diagnostic and treatment options which can sometimes be daunting. Our Breast Health Navigator coordinates these treatments and evaluations, explains the variety of options and is a source of support for patients receiving breast cancer treatment. Specialized classes in breast cancer radiation and breast cancer chemotherapy compliment our breast program. Active involvement in our support programs such as lymphedema counseling and management, as well as a host other of other services, help patients to achieve a full and sustained recovery.

Facilitate Patients to the following CCNC Services:

- ◆ Yoga Program
- ◆ Lymphedema Services
- ◆ Nutritional Counseling
- ◆ Counseling
- ◆ Chemotherapy/Radiation education classes
- ◆ National Research Trials
- ◆ Management of associated side effects from treatment
